📍 Noida, UP

Objective

- Aspiring Data Analyst with hands-on experience in Python, Pandas, SQL, and data visualization.
- Experienced in cleaning real-world datasets and extracting meaningful insights.
- Seeking data analyst internship opportunities to apply analytical and problem-solving skills.

Skills

Languages: Python, C/C++, SQL, HTML, CSS

Libraries: Pandas, Matplotlib

Tools: Git, MySQL, Microsoft Excel, Power BI

Concepts: Data Cleaning, Data Analysis, Data Visualization

Volunteer — IEEE Student Branch, IIIT Noida

Jul 2025 – Dec 2025

- Worked on digital creativity initiatives by designing and improving social media posts to increase engagement and visibility.
- Contributed to frontend development of event websites using HTML and CSS.
- Assisted in improving post reach and views through content optimization and consistent branding.

Education

Jaypee Institute of Information Technology

Jul 2024 – Jun 2028 (Expected)

B.Tech in Information Technology

Projects

Cafe Sales Data Cleaning & Analysis

- Cleaned and standardized a real-world messy cafe sales dataset using Python.
- Normalized fake missing values and corrected data types.
- Validated business logic ($\text{price} \times \text{quantity} = \text{total spent}$).
- Built revenue-based visualizations using Pandas and Matplotlib.
- Currently learning Flask/FastAPI to deploy insights as a web application.

Truly Indian (2025)

- Developed a desktop-first travel website using HTML and CSS.
- Focused on clean UI, semantic HTML, and structured layouts.
- Deployed the project using GitHub Pages.

Farmer Yield Predictor — Smart India Hackathon (2025)

- Designed a machine learning-based system to predict crop yield.
- Provided improvement suggestions using soil, weather, and crop data.
- Cleared the internal SIH round among 100+ teams.

Certifications

- CS50P — Harvard (2024)
- Pandas — Kaggle (2026)
