NOIDA, UP

OBJECTIVE

Motivated Information Technology student with a strong foundation in programming, data analysis, and web development. Passionate about solving real-world problems through clean code, logical thinking, and innovative tech solutions. Seeking opportunities to learn, grow, and contribute to impactful projects.

SKILLS

Languages: C/C++, Python, HTML, CSS

Libraries: Pandas, Matplotlib

Tools: SQL, MySQL, Microsoft Excel, PowerBI, Git

EDUCATION

June 2028 (Expected)

Bachelor of Technology in Information Technology (B. Tech)

Jaypee Institute of Information Technology

PROJECTS

- **Truly Indian (2025)**- Created my first web project (*Truly Indian*), a desktop-first travel site built with HTML/CSS, MongoDB. Focused on clean UI, semantic HTML, and solid structure. Deployed via GitHub Pages (without MongoDB).
- **Farmer Yield Predictor (Smart India Hackathon, 2025)** – Designed a machine learning-based system to predict crop yield and provide improvement suggestions based on soil, weather, and crop data. Cleared the **SIH internal round among 100+ teams**.

CERTIFICATIONS

- **CS50P – Harvard (2024)**: Completed CS50's Python track with 9 problem sets and a final project. Solid foundation in Python programming and computational thinking.
